- ☐ Improving my skills and learning about new technologies.
- ☐ Preparing Flowcharts & Algorithms for the proposed system.
- ☐ Developed Business Logics using Python and Django Web Framework.

Technical Skills:

- Operating System : Windows.
- Language : Python.
- Scripting : HTML, CSS and Bootstrap.
- Framework : Django, Django Rest Framework.
- Version control : GIT
- IDEs : PyCharm, VScode

WORK EXPERIENCE

1. PROJECT: HEALTH CARE MANAGEMENT SYSTEM AT E-HORIZONS SOFTWARE SOLUTIONS PRIVATE LIMITED

Project Name : Healthcare Management System

Duration : June/2020-July/2022

Domain : Health Care Sector

Client : Healthcare System, Los Angeles

Tools & Technologies : Python ,Django ,DRF,Mysql,PostMan

IDLE : VSCode

Role : Jr. Software Developer.

Project Description:

The Health Care Management project is to design web application for various activities in Hospital. The main activities covered are Doctors Information, Patient Details, Billing, Diagnosis and Medical Products. The project has 4 modules namely General, Inpatient, Outpatient and Reports. Details regarding patient such as name, gender, address, type of patient complaint, assigning treatment department based on complaint etc., is captured and a unique registration number for new patient is automatically generated. All the details such as provisional diagnosis, unit number etc. is taken for the patients who had already been treated at some other units. The registration number in this module is reflected from the General module. Inpatient: If the patient is admitted into the hospital all the details such as provision diagnosis, medical records, discharge summary, ward etc. are gathered. There are lots of reports used for monthly, yearly, fortnight etc. which are taken care here.

2.PROJECT: WEALTH MANAGEMENT SYSTEM AT E-HORIZONS SOFTWARE SOLUTIONS PRIVATE LIMITED

Project Name : Merrill Lynch Wealth Management.

Duration : September/2022-August/2023

Domain : Banking and Finance

Client : Merrill Lynch Bank of America – New York, NY.

Tools & Technologies : Python, Django, Django Rest Framework

Role : Jr. Software Developer

Project Description:

This project was aimed at developing an application to help users track their investment and manage them. The system helps the user check their transactions made in the equity market. The software provides the user with his/her current holdings along with the profit or loss earned from time to time. The software has scope for additional features which would then provide a complete solution to the user.

You'll have a more complete view of your total financial picture with single login access between Bank of America banking and Merrill Lynch Wealth Management brokerage accounts.
